## iTunes Description

Do you love poker? Want to play against real people instead of a computer, right from the comfort of your iPhone or iPod Touch? Come and join the club where poker lovers from all over the world hang out to play and chat about their favorite game - poker. All level of Pokerists welcome.

You've joined a game but haven't really got anything in your hand. Everyone has folded except you and one other user. You take another at your cards. Can you bluff your way through? Your device vibrates; you have to make a decision, now. You hit the fold button, which was a wise decision as it turns out. The other user wasn't bluffing.

Texas Poker holds plenty of exciting poker action for Pokerists of all levels. Choose a desk and play a hand. When you want to try your luck elsewhere, there are lots of other tables to consider.

## AppStore Reviews

### **Better than Zynga ★★★★★**

by theoriginaljello on May 30, 2010 0.5

I got rid of zynga poker...got old after a few weeks. This app is much better so far. The game play is much smoother and more realistic. I'm not playing with or against pocket AA all the time. I gave zynga poker 4 stars, so this app deserves 5.

### **Best Texas hold'em app ★★★★★**

by triplepointband on Jun 6, 2010 0.5

This app is the best free poker app, better than the rest of the apps that are trying to do poker, most realistic and good interface, you can get achievements but you can't look at them, only online against other real people, no menu for game settings or i can't find it lol, good music, you won't regret getting this app

## Giveaway

Every week we giving away one iDevice (iPhone 3GS/4G, iPod Classic/Touch, iPad, Mac Mini and any other future device) in support of International Poker Day election.
